EN 13043

Filler aggregates for bituminous mixtures and surface treatment for
roads, airfields and other trafficked areas

Particle size	Declared values	passing 0.063mm	> 70%
Loose bulk density in kerosene	Declared value		0.5 – 0.9 g/ml
Water content	Declared value		< 1%
Stiffening properties			
Voids of dry compacted filler	Category		V_{NR}
Delta ring and ball	Category		$\Delta_{R\&B}NR$
Bitumen number	Category		BN_{NR}
Water solubility and susceptibility	Category		WS_{NR}
Calcium carbonate content	Category		CC_{70}
Calcium hydroxide content of mixed filler	Category		$KaNR$
